## PROJECTS

### PORTFOLIO [← Click here for Demo](#)

#### Self-Intro

- Built a personal portfolio website using React, Vite, and CSS to showcase projects, skills, and contact functionality, enhancing personal branding and online presence.
- Developed responsive and accessible UI components with modern CSS and React, ensuring a seamless experience across desktop and mobile devices.
- Implemented a fully functional contact form to allow direct communication with visitors, demonstrating frontend form handling and basic user interaction features.

### WEATHER-APP [← Click here for Demo](#)

#### Weather-app using API

- Web-app weather application. Developed and utilized APIs to fetch real-time weather data, providing users with up-to-date information on their Web-site.
- User interface for weather data. Implemented to design a user-friendly experience for displaying current conditions, forecasts, and potentially other weather details.
- Leveraged APIs for real-time weather information. Integrated APIs to retrieve accurate and up-to-date weather data for the application.

### WEB PAGE DEVELOPMENT USING DATABASE

#### COVID 19 HOSPITAL BED BOOKING USING SQL

- COVID-19 hospital bed booking web application using SQL. Developed this application which helps patients find and reserve beds at available hospitals during the pandemic.
- Built a hospital bed availability database with SQL. This facilitated real-time updates and efficient bed allocation for critical COVID-19 patients.
- Contributed to a user-friendly web interface for bed booking. This ensured easy access for patients to search and reserve beds based on location, bed type, and other vital information.
